Mary Edna Tucker
648 West Nichols
Springfield, Missouri 65802

Dear Ms. Tucker:

This office received a report of a pollutant discharge resembling laundry waste coming from your home at 648 West Nichols and draining to the alley and subsequently into Nichols Street. This practice is acceptable for uncontaminated storm water or ground water; however, laundry waste must be disposed of through an approved waste disposal system.

Please be advised that the discharge of pollutants is in violation of city, state, and federal water pollution laws and a violation of city health ordinances. Steps should be taken to eliminate this discharge by placing it into an approved waste disposal system within thirty (30) days of the date of this letter. This office maintains periodic surveillance throughout the corporate limits and will inspect for compliance at the end of the thirty day period and will take proper legal action if compliance is not met.

If you have any questions please call 864-1924.

Yours truly,

Stephen D. Short
Water Pollution Control Inspector II
